- (1) Flow rates for 3/4" through 6" flow controllers with flow rates from 5-540 G.P.M. are in increments of 1 G.P.M. See Table (B).  
Flow rates for 1/2" and 3/4" flow controllers for flow rates from 0.25 to 3.5 G.P.M. See Table (A).  
Only flow rates 12, 15, and 20 GPM are available in Model No. 100-1C. See Table (C). Flow rates for 1/2" Brass 0.25 to 10 G.P.M. See Table (A) (B).
- (2) Maximum number of flow inserts in a given nipple size. FLO-CONTROLLET can be made with fewer flow inserts, for less flow than minimum listed. Indicated prices will apply.
- (3) Installs between two standard flanges, bolts must be a minimum of 1" longer than normally required. Gasket required on both sides.
